Govi Artik 2000P

Do you want to remain flexible and spontaneously decide whether to use your trailer for freezing or cooling? Don't worry! Arktik 2000P could be exactly what you are looking for.

This unit has been designed to give insulated trailers maximum flexibility.

The temperature can be adjusted from -20 °C to 10 °C. This way, the unit can be used for both freezing and cooling

All Trailers have AL-KO chassis

While original chassis usually have straight axles, AL-KO axles are equipped with independent wheel suspension and torsion bars as standard. This system requires little installation space and offers optimum driving dynamic

Govi Artik 2000P

Our units consist of two parts: the condenser on the outside and the evaporator on the inside of the trailer. Both parts are mounted on an insulating core and form an easy to install plug-and-play unit. We use the same casing for all our refrigeration units standardising the size of the cut out for all trailers.

The casing is made of power-coated steel sheet including a shapely front hood made of ABS plastic. An electronic controller monitors and regulates the operating temperature. Automatic periodic defrosting is provided by a programmable electronic thermostat and an electronic thawing-off device. Behind the lockable operating cover you will find a control switch and a light switch for the interior lighting of the refrigeration trailer.

Govi Artik 2000P

Technical Data 2000P

temperature range	-20 to 10 °C	defrosting	1230 W
max. operating temperature	40 °C	air flow evaporator	1100 m ³ /h
max. volume trailer	10 m ³	air flow condenser	1100 m ³ /h
power supply	230 V	protection class, mounting side	54 IP
frequency	50 Hz	refrigerant	R452A
cooling capacity	1500/2050 W	refrigerant quantity	1170 g
power consumption	1000/1200 W	weight	63 kg
current consumption LRA	32 A	colour	9010 RAL
current consumption FLA	6.5/7.0 A		

Govi Artik 2000P

Equipment

- digital touch screen thermostat
- CFC-free refrigerant R452A, GWP 2141
- water-resistant lockable control panel
 - suction line cooled compressor
 - automatic hot gas defrosting
- weatherproof electrical plug and socket
- pre-wired cable to connect door contact switch
 - pre-wired cable to connect light
 - oval wall light and light bulb

Features

- Eco-friendly CFC-free refrigerant, minimum energy consumption
- plug & play installation – easy handling, excellent usability
 - premium-quality, German engineering
 - weather-resistant, robust construction
 - Bluetooth module available
 - reliable and quiet operation
 - low maintenance
 - low weight
 - elegant, timeless design
